Dividends received in shares are recorded only the number of shares received, not the increase in investment value and financial income.

Provisions for devaluation of investments are made at year-end as follows:

- For trading securities investments: the basis for making provision is the difference between the original cost of the investments recorded in the accounting books and their market value at the time of making the provision.
- For an investment that is held for a long time (not classified as a trading security) and has no significant influence on the investee: if the investment in listed shares or the fair value of the investment is If the investment is determined reliably, the provisioning is based on the market value of the shares; if the

investment cannot determine its fair value at the reporting time, the provision is made based on the consolidated financial statement at the time of making provision of the investee.

- For investments held to maturity, the recoverability is assessed to make provision for doubtful debts in accordance with the law.

2.7. Account Receivable

The receivables shall be kept records in details according to period receivables, entities receivables, types of currency receivable and other factors according to requirements for management.

Provision for doubtful debts is set aside for loan losses: receivables overdue economic stated in the contract, the loan agreements, contractual commitments or commitments and debts owed undue but is unlikely to cost recovery. In particular, the provision for overdue debts are paid based on time repayment of principal under the original purchase agreement, regardless of the extension of the debt between the parties and undue receivables liquidation but the debtors have fallen into bankruptcy or dissolution procedures, missing, flees.

2.8. Inventories

Inventories are stated at cost. Where net realizable value is lower than cost, inventories are recorded at net realizable value. Cost of inventory includes the cost of purchasing, processing and other directly attributable costs incurred in bringing the inventory to its present location and condition.

The value of inventories is determined using the weighted average method.

Inventories are accounted for using the perpetual inventory method.

Method of determining the value of work in progress at the end of the period:

- The cost of production in progress is aggregated with the cost of main materials for each type of unfinished product.

Provision for devaluation of inventories is made at the end of the period based on the difference between the cost of inventories and the net realizable value.

2.9. Fixed assets

Implementing Circular 45/2013/TT-BTC dated April 25, 2013 and Circular amending and supplementing No. 147/2016/TT-BTC dated October 13, 2016 of the Ministry of Finance, guiding the management regime, use and depreciation of fixed assets. Tangible fixed assets, intangible fixed assets are recorded at cost. In the course of use, tangible fixed assets, intangible fixed assets are recorded at cost, accumulated amortization and carrying amount. Depreciation is provided on a straight-line basis. The estimated amortization period is as follows:

- Buildings and structures	07 - 30 years
- Machinery and equipment	06 - 10 years
- Transportation vehicle	05 - 10 years
- Office equipment	03 - 07 years

Intangible fixed assets are brand equity LICOGI: Initially recognized at cost and amortized on a straight-line basis over a period of 10 years.

2.10. Prepaid expense

Expenses incurred related to the results of production and business activities of many accounting periods are accounted into prepaid expenses to be gradually allocated to business results in the following accounting periods.

The calculation and allocation of long-term prepaid expenses to production and business expenses in each accounting period is based on the nature and extent of each type of expense to select a method and reasonable allocation criteria. Prepaid expenses are amortized to production and business expenses on a straight-line basis.

2.11. Debts payable

Liabilities are monitored according to their payable terms, payable objects, payable currency types and other factors according to the Company's management needs.

2.12. Loans

The amount of a finance lease liability is the total amount payable calculated at the present value of the minimum lease payment or the fair value of the leased asset.

Loans and financial lease liabilities are monitored by each lender, each loan agreement and the repayment term of the loans and finance lease debt. In case of borrowings and debts in foreign currencies, detailed monitoring is performed in original currencies.

2.13. Borrowing costs

Borrowing costs are recored into operation cost of the the accounting period they arise, excluding borrowing costs directly related to construction in pregress or unfinished assets are recored into these asset's values (capitalized) when all criterias mentioned in Vietnam Accounting Standard No.16 "Borrowing costs", are met. Furthermore, with specific loans for generating fixed assets, investment properties, borrowing costs are capitalized even when time of construction is shorter than 12 months.

For general loans, which are used for investment in construction or production of an unfinished asset, the amount of borrowing costs that are eligible for capitalization in each accounting period is determined at the rate of interest. capitalization rate for the weighted average accumulated costs incurred for the investment in the construction or production of that asset. The capitalization rate is calculated using the weighted average interest rate on outstanding loans for the period, excluding consolidated loans for the purpose of having a qualifying asset.

2.14. Accrued Expenses

Accrued Expenses for goods and services received from sellers or provided to buyers during the reporting period but have not actually been paid yet and other payables such as wages, leave, expenses during the

reporting period. The production stoppage time according to the season, the season, the interest expense on the loan payable, etc. is recorded in the production and business expenses of the reporting period.

The recognition of accrued expenses into production and business expenses in the year is implemented according to the principle of matching between revenue and expenses incurred in the year. Accrued expenses are settled with the actual amount of expenses incurred. The difference between the amount deducted and the actual cost is reversed.

2.15. Provisions payable

Provisions for payables are recognized only when the following conditions are satisfied:

- The enterprise has a present obligation (legal or constructive) as a result of a past event;
- It is probable that an outflow of economic benefits will result in the payment of the debt obligation; and
- Provide a reliable estimate of the amount of the obligation.

The recognized amount of a provision for payable is the most reasonable estimate of the amount that will be required to settle the present obligation as at the balance sheet date.

Only expenses related to the provision for payables initially made will be offset by such provision.

Provisions for payables are recognized in production and business expenses of the accounting period. The difference between the provision for payables made in the previous accounting period that has not yet been used up is larger than the provision for payables made in the reporting period, which is reversed and recorded as a decrease in production and business expenses in the period minus the difference. The larger amount of the provision for warranty payments for construction works is reversed into other income in the period.

2.16. Owner's equity

Owner's equity is stated at actually contributed capital of owners.

Equity premium reflects the difference between par value, direct costs associated with the issue of shares, and the issue price of shares (including in the case of treasury stock re-issuance), and may be a surplus, positive (if the issue price is above par and the direct costs associated with the issue of the shares) or a negative surplus (if the issue price is below par and the direct costs associated with the issue of the shares).

Other capital under Owner's equity reflects the amount of business capital formed by the addition of business results or by donation, donation, sponsorship, or revaluation of assets (if it is allowed to record an increase or decrease in investment capital). owner's property).

Treasury shares are shares issued by the Company and repurchased by the Company. These shares are not canceled and will be re-issued within the time period prescribed by the law on securities. Treasury shares are recognized at the actual repurchase value and presented in the Balance Sheet as a decrease in Owner's invested capital. Cost of treasury shares upon re-issuance or when used to pay dividends, bonuses, etc., is calculated according to the weighted average method.

Undistributed profit after tax reflects the business results (profit and loss) after corporate income tax and the distribution of profits or handling of losses of the Company. Profit distribution is made when the Company

has undistributed after-tax profit not exceeding the undistributed after-tax profit in the financial statements after excluding the effects of profits recognized from Cheap buy deals. In case of paying dividends, profits to owners in excess of undistributed after-tax profits are recorded as a decrease in contributed capital. Undistributed profit after tax may be distributed to investors based on the capital contribution ratio after being approved by the General Meeting of Shareholders/Board of Directors and after setting aside funds in accordance with the Company's Charter and provisions of Vietnamese law.

Dividends payable to shareholders are recognized as payable in the Balance Sheet of the Company after the announcement of dividend payment by the Board of Directors and the notice of the closing date of the right to receive dividends from the Company Vietnam Securities Depository Center.

2.17. Revenue

Revenue from a service transaction is recognized when the outcome of the transaction can be measured reliably. In case the service provision transaction involves many periods, revenue is recognized in the period according to the result of the work completed as at the date of the Consolidated Balance Sheet of that period. - Borrowing costs;
- Loss due to foreign exchange differences arising from transactions relating to foreign currencies;
- Provision for devaluation of trading securities, provision for loss of investments in other entities, loss arising from the sale of foreign currencies, loss of exchange rates...

The above amounts are recognized according to the total amount incurred during the period, not offset against financial income.

2.20. Corporate income tax

- Current tax payable is calculated based on taxable income for the year. Taxable profit differs from net profit as reported in the income statement because taxable profit does not include items of income or expense that are taxable or deductible in other years (including carry-over losses, if any) and further excludes items that are not taxable or deductible.
- The Company applies the corporate income tax rate of 20% on taxable profits to ordinary business activities.
- The determination of corporate income tax of the company is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the examination results of the competent tax authorities.

2.21. Earnings per share

Basic earnings per share are calculated by dividing the after-tax profit or loss allocated to shareholders who own common shares of the Company (after adjusting for the appropriation of the Bonus, Welfare and Merit Fund). Board of Directors bonus) for the weighted average number of common shares outstanding during the year.

2.22. Segment Information

A segment is a distinct identifiable component of the Company that is engaged in providing related products or services (business segment), or in providing products or services within the Company. a particular economic environment (geographical division). Each of these segments is subject to risks and rewards that are different from those of the other segments.
